

Jaaroverzicht 2015

Project dagvlinders Durme- en Scheldegebied

Anekdot van **Lena** (5 jaar)
kleindochter van René Pletinck

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

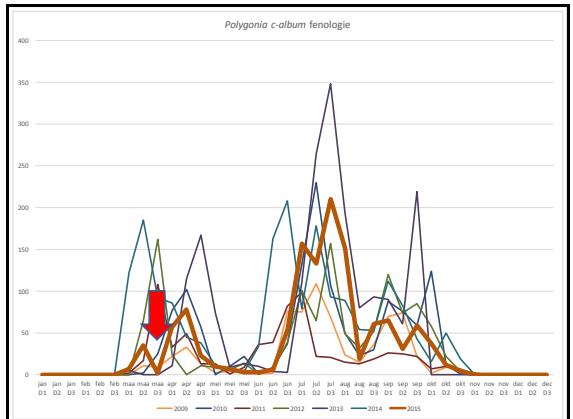

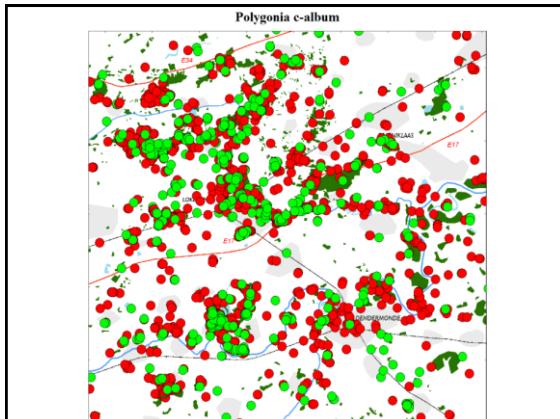

- Lena gaat graag eens kijken in de tuin. Ze kent al enkele dagvlinders zoals Koolwitje, Dagpauwoog, Atalanta.
- Maar **Gehakkelde aurelia** vind ze nogal moeilijk om uit te spreken.
- Toen zag ze die witte C op de onderzijde achtervleugel en met wat fantasie zie je daar ook de hoorn van een telefoon in.
- Ze zei tegen pépé René: 'Kijk pit, dat is een **telefoonvlinder** !'
- **Lena, 5 jaar.**

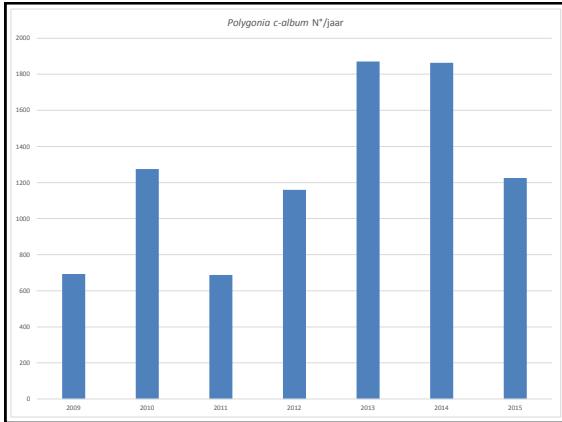

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Gehakkelde aurelia
(*Polygonia c-album*)

Onze
overwinteraars

Eric Pannier,
20 oktober 2015, Waasmunster

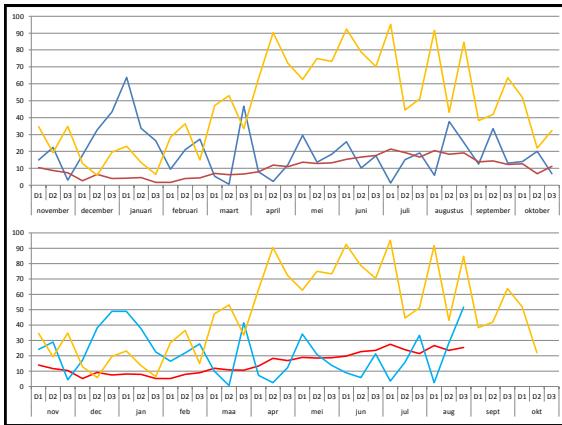

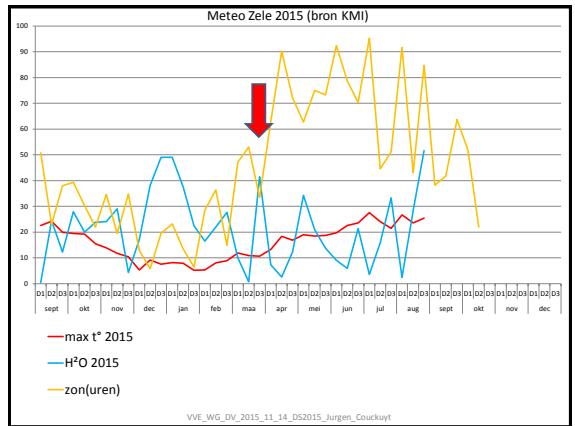

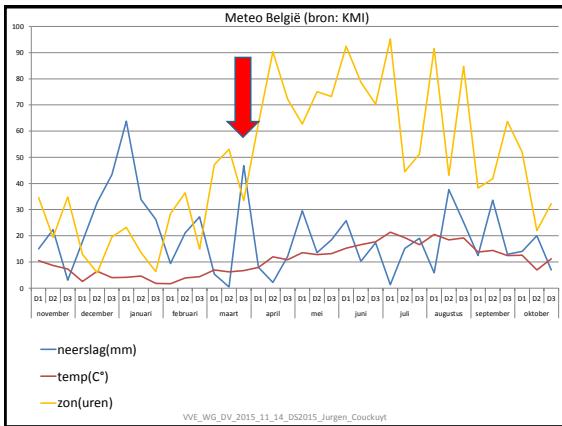

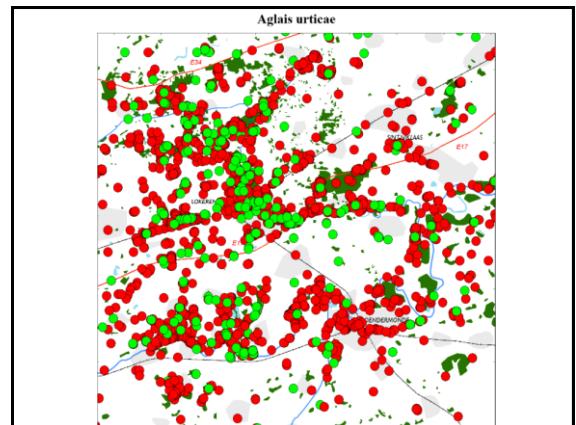

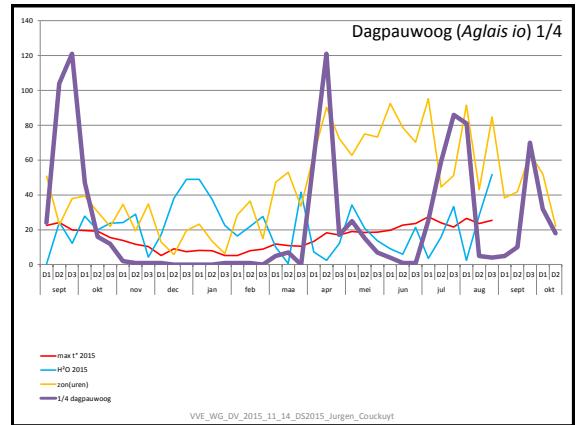

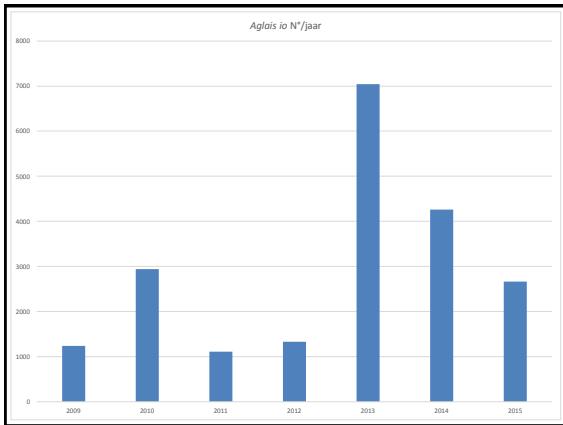

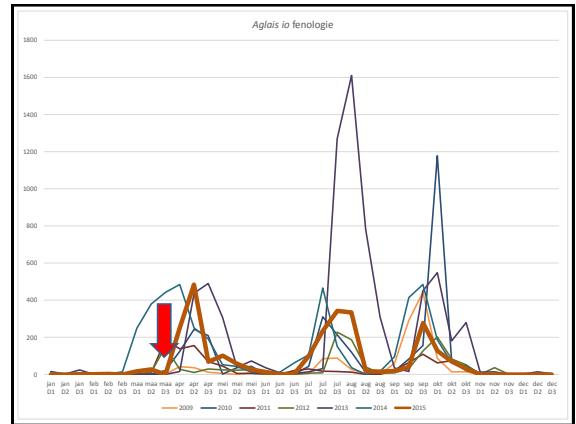

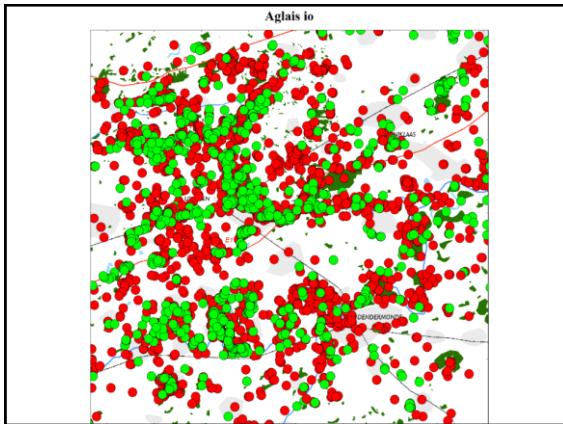

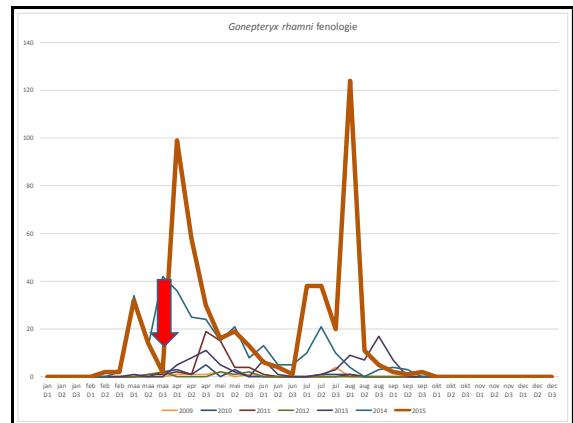

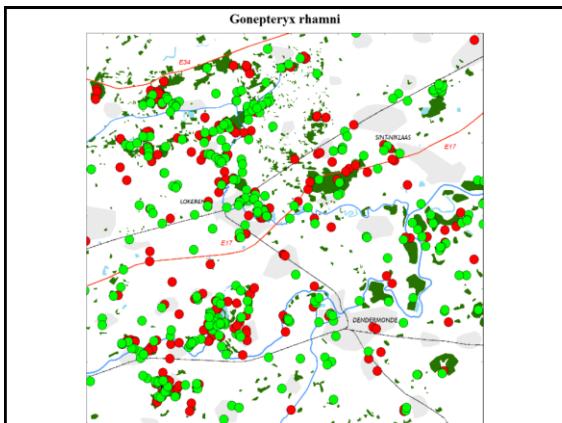

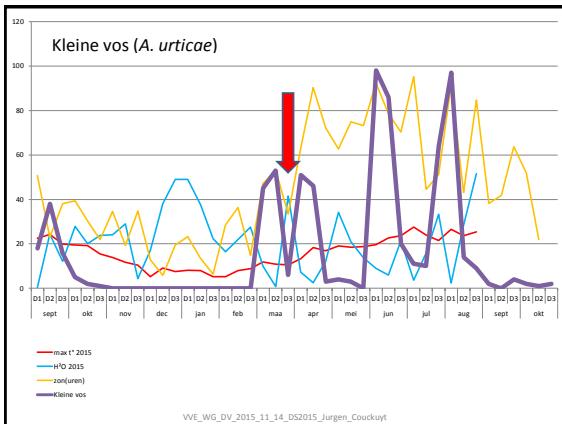

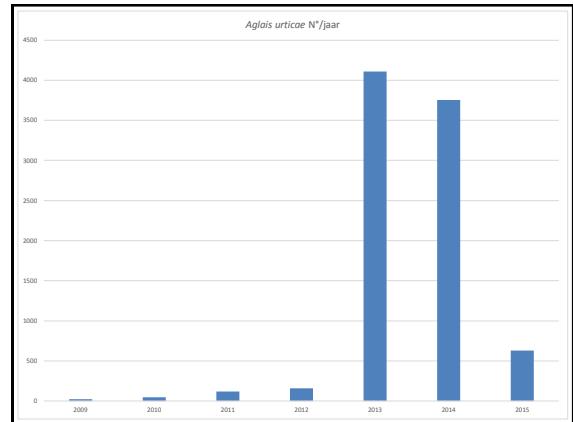

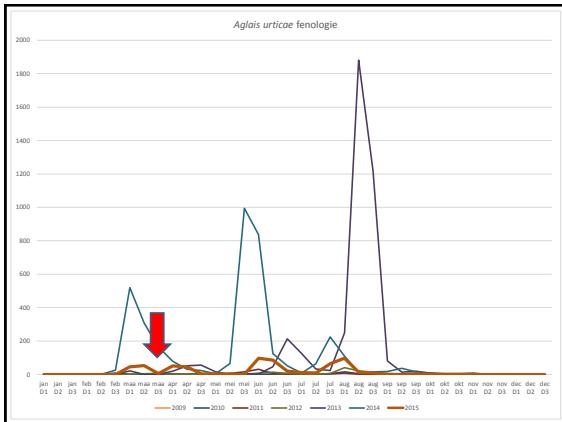

Het voorjaar

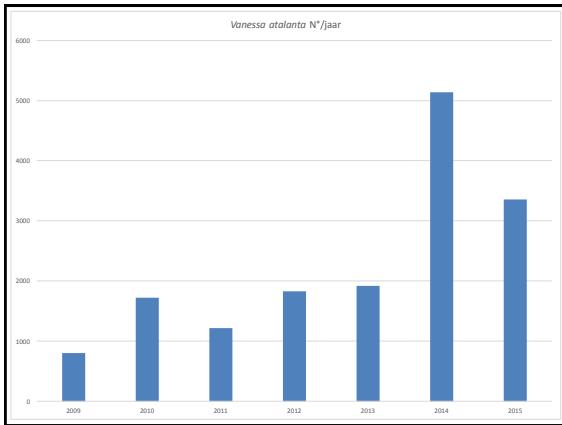

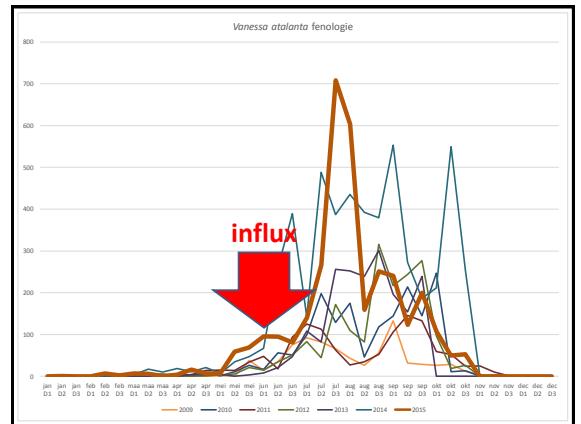

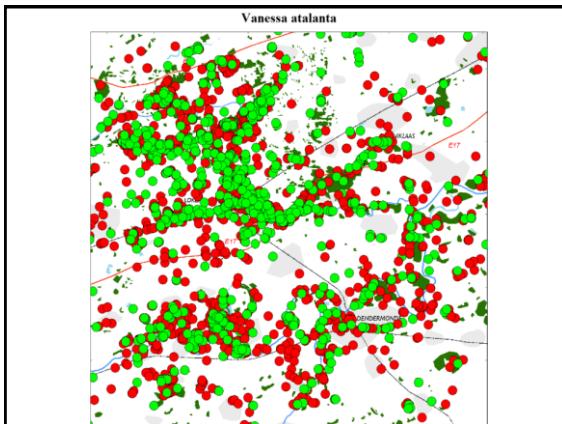

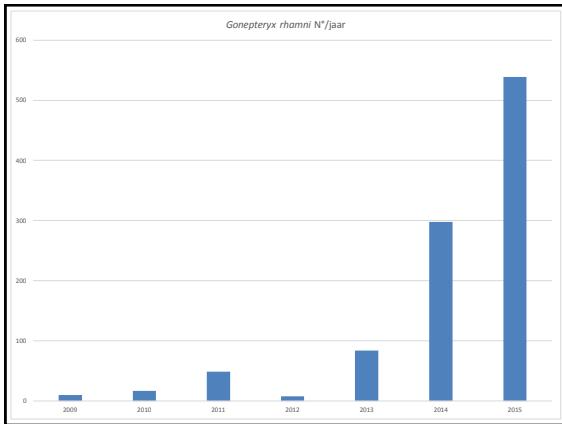

- Heel natte & zachte winter gehad.
- Opvallend weinig overwinteraars te zien.

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

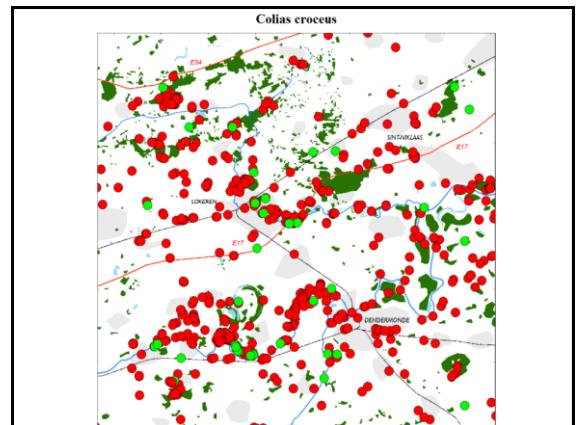

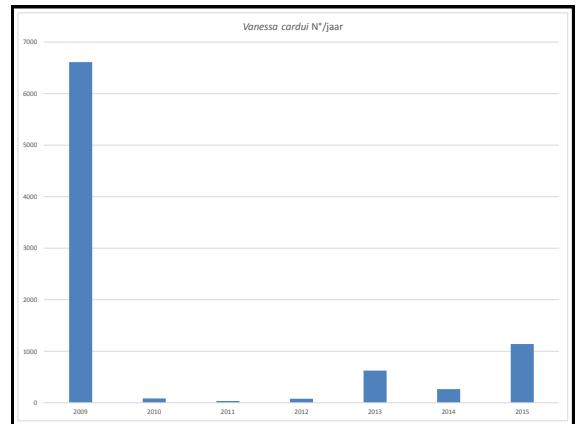

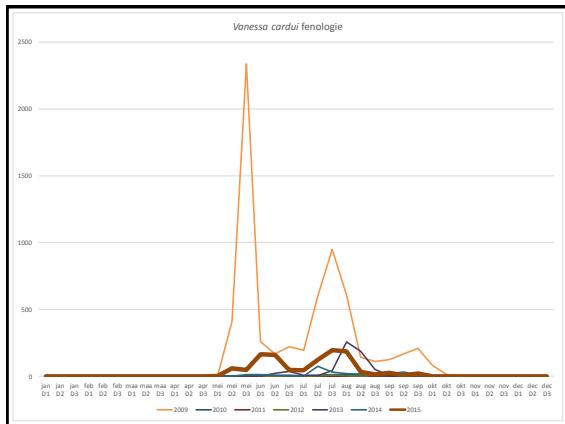

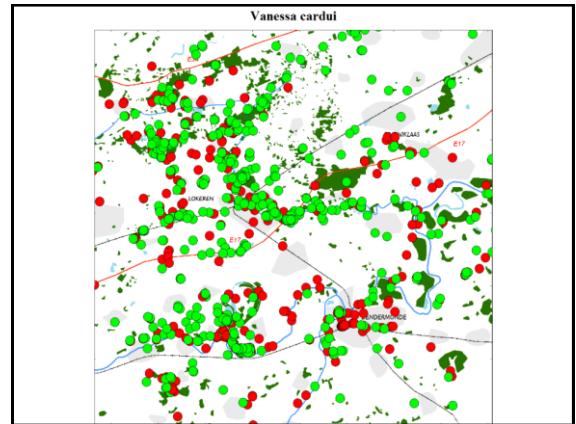

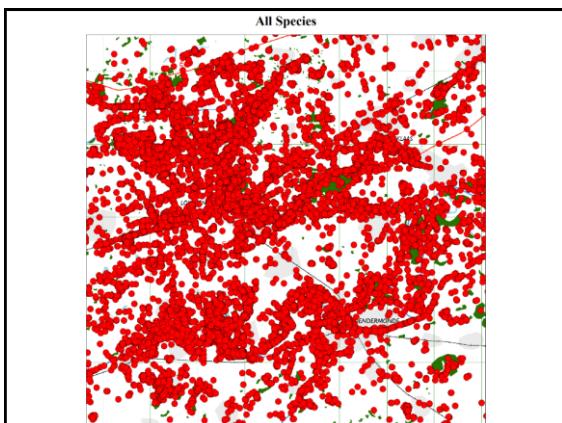

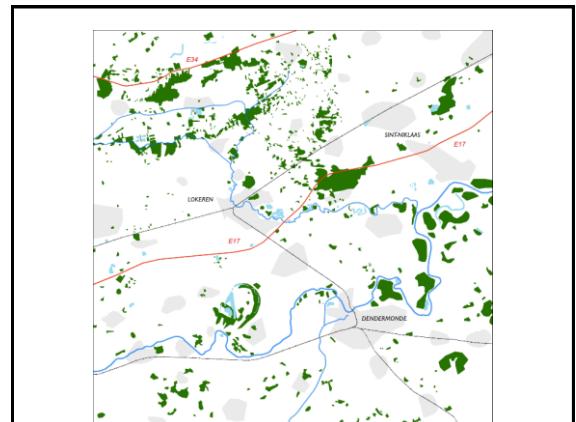

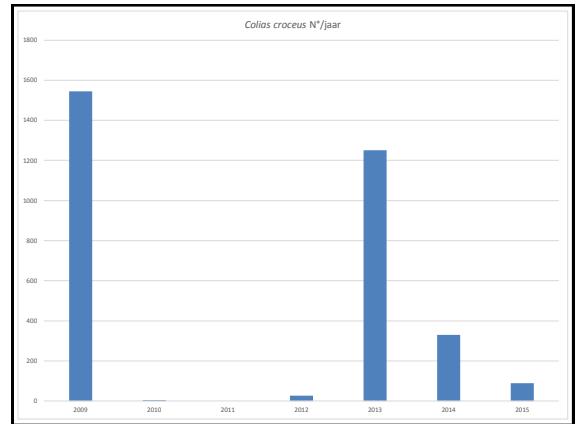

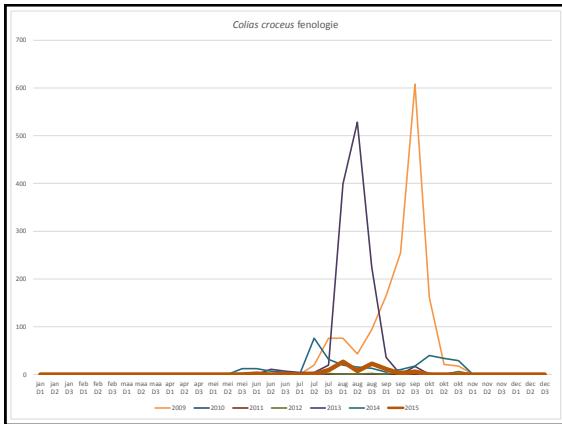

Onze trekvlinders

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

**- 64550 waarnemingen op 3 jaar -
- door 603 waarnemers -**

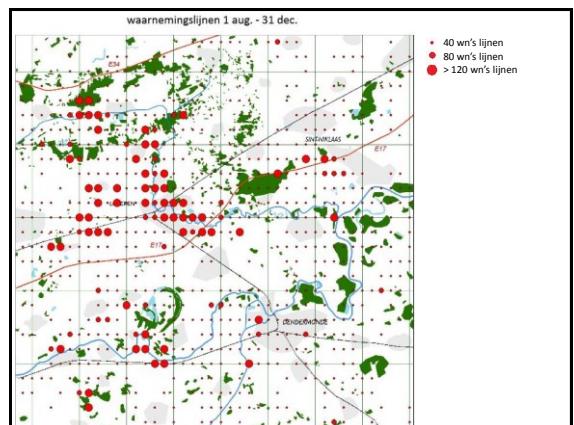

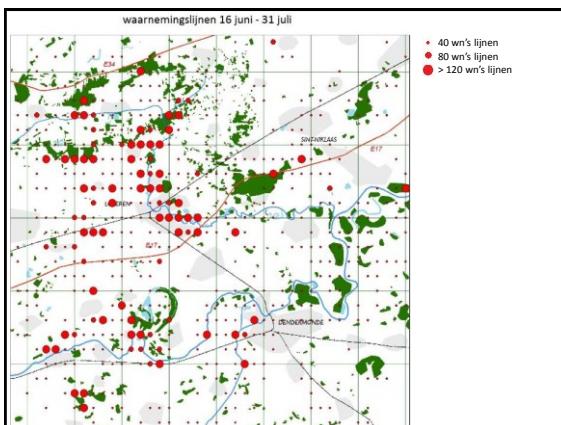

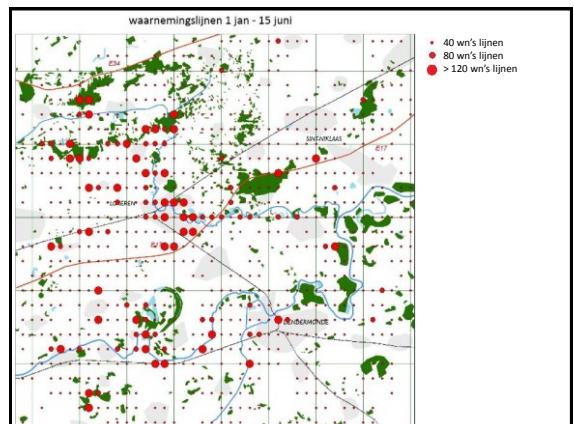

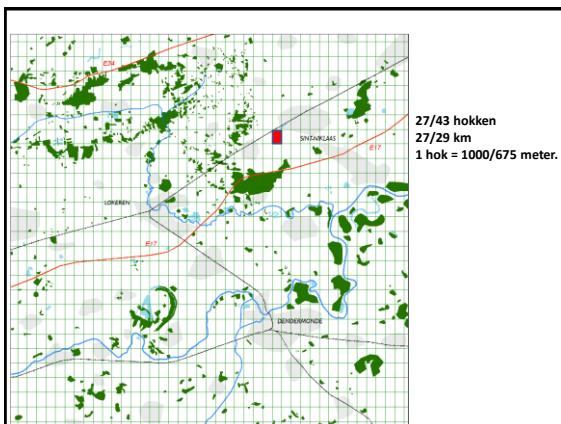

- 140 waarnemers > 25 waarnemingen → 62077
- 87 waarnemers > 50 waarnemingen → 60231
- 66 waarnemers > 75 waarnemingen → 58944
- 55 waarnemers > 100 waarnemingen → 57965
- 39 waarnemers > 200 waarnemingen → 55688
- 28 waarnemers > 300 waarnemingen → 53033
- 25 waarnemers > 400 waarnemingen → 51973
- 21 waarnemers > 500 waarnemingen → 50216
- 13 waarnemers > 1000 waarnemingen → 44298
- **5 waarnemers > 2000 waarnemingen → 33346 (50%)**
- 3 waarnemers > 5000 waarnemingen → 26327
- 1 waarnemer > 10.000 waarnemingen → 12596

**Aantal waarnemingslijnen per hok
tijdens 3 vliegperioden.**

- vliegperiode **1 jan – 15 juni.**
- vliegperiode **16 juni – 31 juli.**
- vliegperiode **1 aug – 31 dec.**

- t.e.m. 40 lijnen/ hok.
- t.e.m. 80 lijnen/hok.
- **> 120 lijnen/hok.**

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Is dit een juiste weergave?

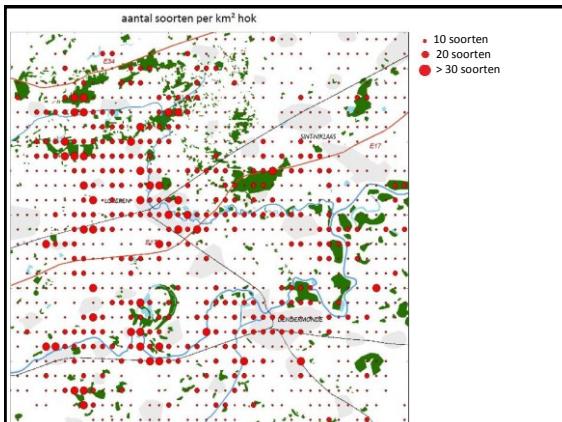

- Is 40 – 80 – 120 een juiste instelling ?
- Wat dan wel ?
- Andere parameter → aantal soorten/hok ?

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Aantal **soorten** per hok.

- t.e.m. 10 soorten.
- t.e.m. 20 soorten.
- > 30 soorten.

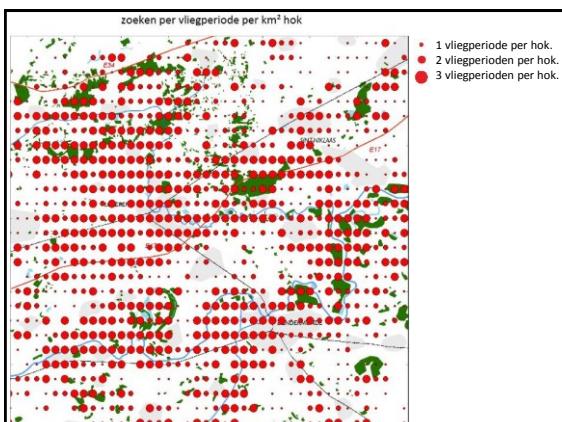

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Bezocht hok tijdens **1 en/of 2 en/of 3 vliegperiodes.**

- 1 vliegperiode gelopen per hok.
- 2 vliegperioden gelopen per hok.
- 3 vliegperioden gelopen per hok.
- Onafhankelijk van aantal waarnemingslijnen per vliegperiode !
- Vliegperiodes bepaalt volgens vorig model.

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Of moeten we a.d.h.v. **één bepaalde soort** de zoekintensiteit bepalen?

- **3 doelsoorten** niet ok wegens lokale kleine populaties → cfr. vliegperiodes.
- Dus soorten waar je effectief naar op zoek moet gaan → **meerdere generaties**.
- Soorten die **goed verspreid** zitten in het projectgebied.

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Onze Blauwtjes

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

2015 was een topjaar voor onze Blauwtjes !

- Aanwezigheid van **Bruin blauwtje**, en/of **Icarusblauwtje** en/of **Kleine vuurvlinder** in alle mogelijke potentiële biotopen.
- Uit deze groep kiezen we de **dagvlinder van het jaar 2015** !

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Lochristi.

Daknam.

Zele.

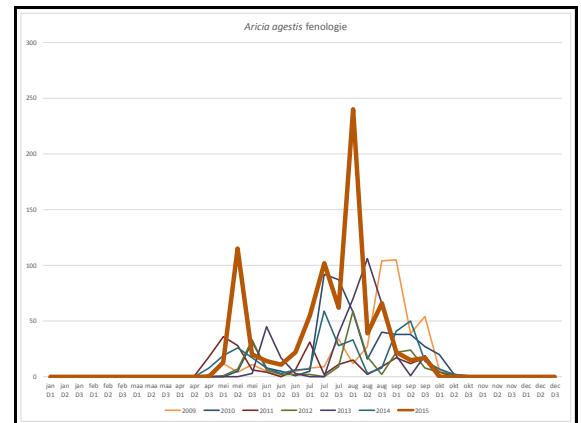

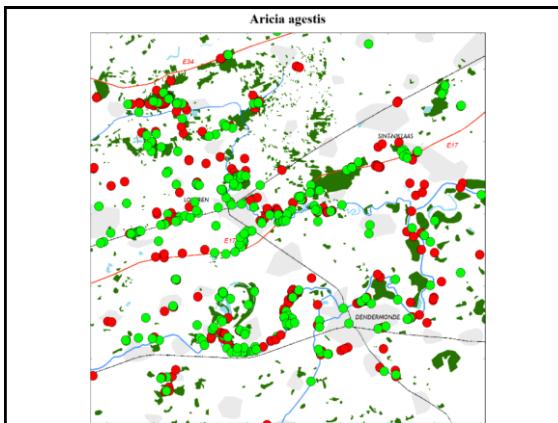

Lokeren.

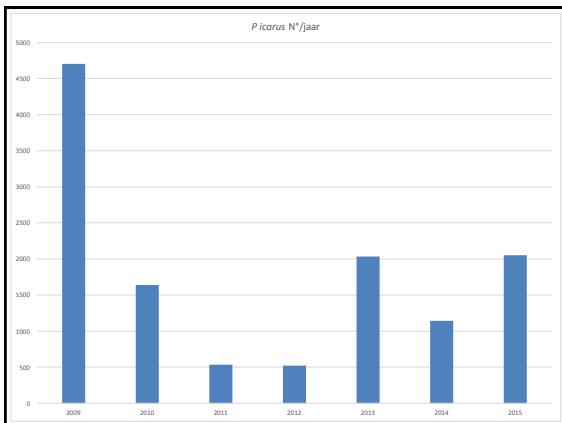

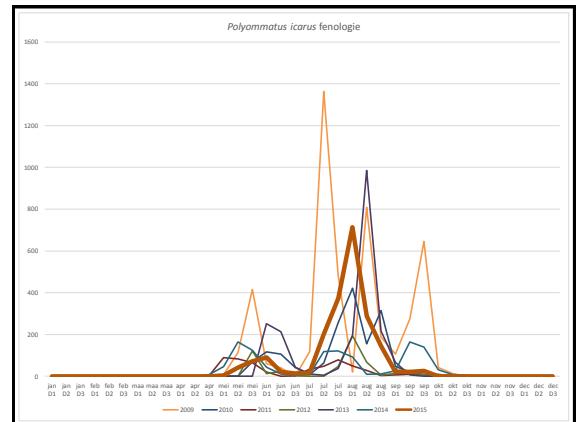

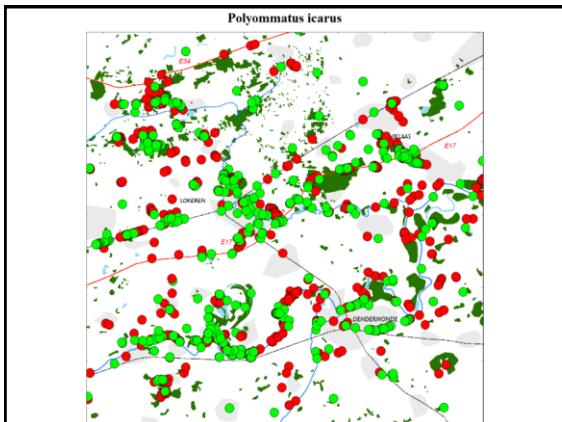

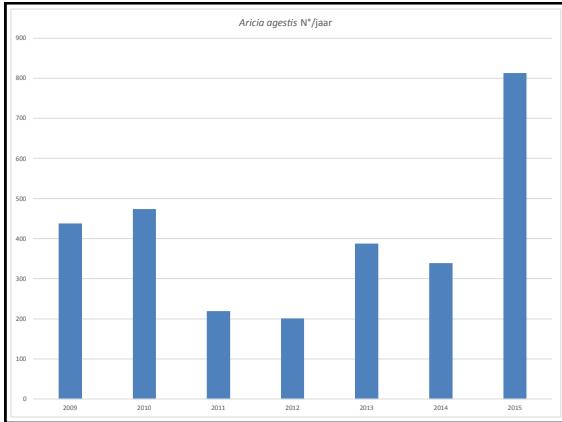

Welke dagvlinder is de
dagvlinder van het jaar 2015 ?

Gerichte zoekacties in 2015

- Eikenpage (*Favonius quercus*) → 3 boscomplexen.
- Aardbeivlinder (*Pyrgus malvae*) → voormalig militair domein Westakkers
- Dagvlinderwandeling Hamme.
- Big 3: Grote weerschijnvlinder (*A. iris*), lepenpage (*S. w-album*) en Kleine ijsvogelvlinder (*L. camilla*) → Berlare.
- Hooibeestje (*C. pamphilus*) → Waasmunster en klaverblad St-Niklaas.
- Big 3 (eitjes, rupsen & poppen) → Berlare.

Onderzoek naar populatiegrootte Hooibeestje

Uitbreidingen

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Vaststellingen & toekomst?

- Veel zwervers gevonden maar vermoedelijk omdat biotopen ondermaats werden door droogte.
→ talud E17 kon je geen gras meer vinden !
- Lage aantallen op droogste biotopen.
- Bermbeheer St-Niklaas wordt aangepast i.f.v. Hooibeestje.
- Begrazingsblokken klaverblad worden geëvalueerd i.f.v. Hooibeestje → graasperiode aanpassen.

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Big 3

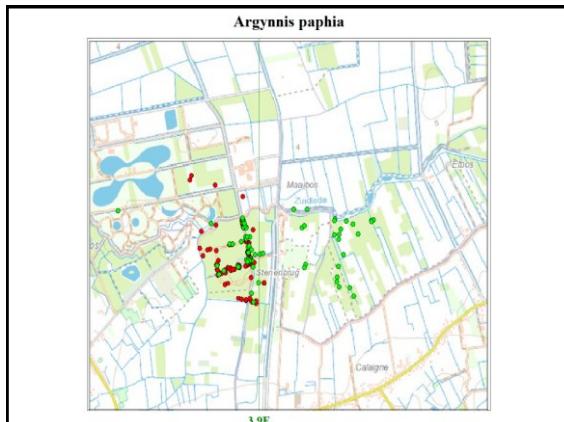

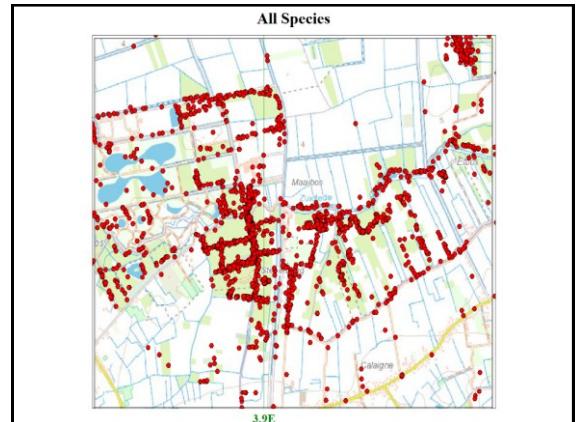

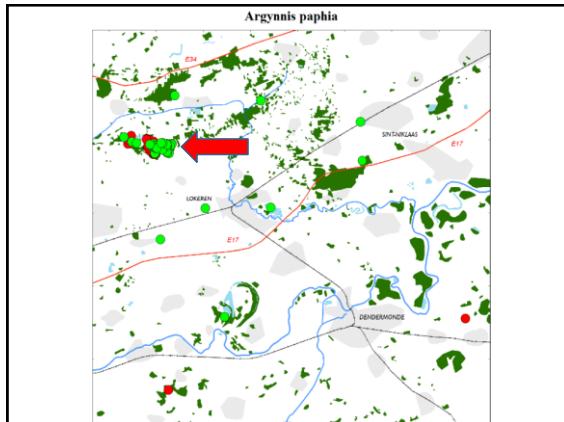

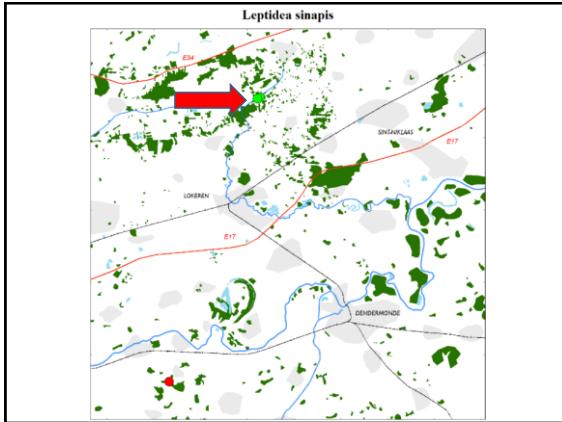

Big 3

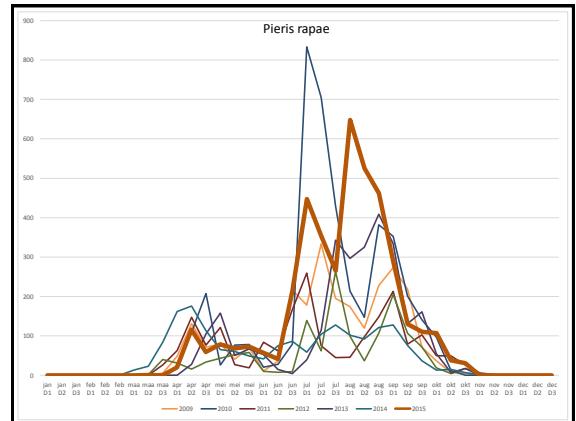

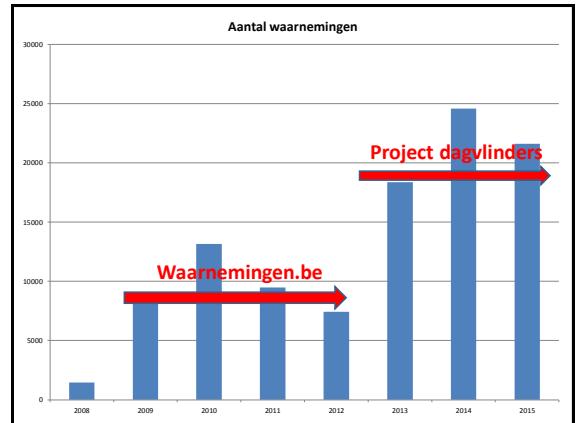

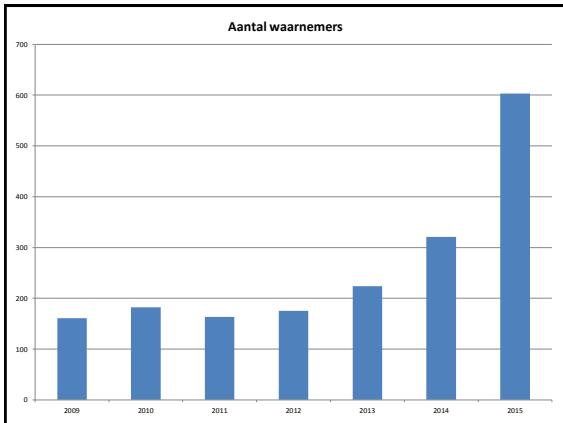

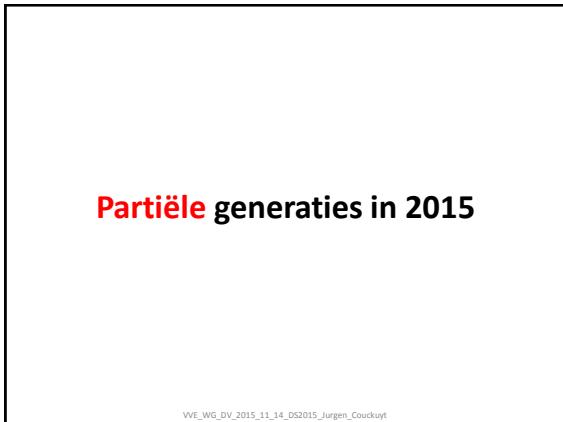

Opvallende najaarsgeneratie van het Klein koolwitje

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

Momenteel bedraagt het aantal soorten vanaf 2013 t.e.m. 2015...

33 soorten !

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt

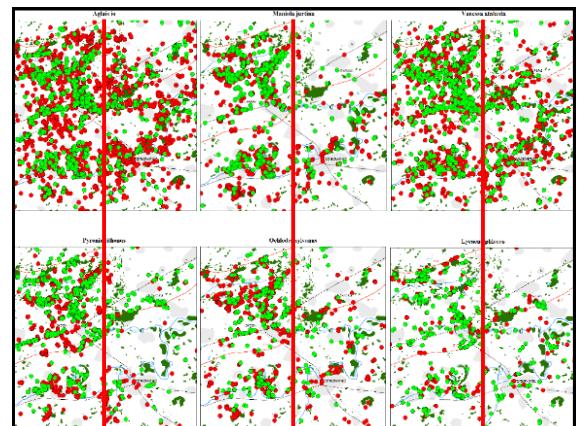

Is er nog iets om naar uit te kijken ?

- **Geelsprietdikkopje (*Thymelicus sylvestris*)**
→ Heeft deze soort ooit wel voorgekomen in ons projectgebied ?
- **Kaasjeskruiddikkopje (*Carcharodus alceae*)**
→ Waar duikt een nieuwe vindplaats op ?
- **Argusvlinder (*Lasiommata megera*)**
→ Komt deze soort nog terug ?
- **Nieuwe soort ?**

VVE_WG_DV_2015_11_14_DS2015_Jurgen_Couckuyt
