In 1981 Greathead described *Pachyanthrax laconae* after 10 specimens caught on 5.V.1975 near Sparta (Greece). Several years later we described *Thyridanthrax kolokotronis* after 110 specimens caught in several localities on the Pelopónissos (Greece). At the time of description the paper of Greathead was unknown to us. Later we compared both descriptions and came to the conclusion that *T. kolokotronis* must be regarded as a synonym of *P. laconae*. Our paper, however, can still be used as a useful tool to identify *P. laconae* and for the distributional data.

*Thyridanthrax kolokotronis* Dils & Van de Weyer, 1997, junior subjective synonym of *Pachyanthrax laconae* Greathead, 1981, **syn. n.**
